- Very good engineering background in technical codes.
- Very good experience in all type of concrete work “forming, placing concrete, concrete patch plan, codes and specifications, quality of work”.
- Very good experience in field tests at site work.
- Very good experience in Iraqi markets “ suppliers”, type of material, prices, availability, quality,

Professionals Skills :-

- Excellent experience in facilities maintenance inspection and facility management duties, inspection, reporting, advising and. Recommendation and modifications when it is required, made schedule sheet for inspection process, full knowledge in all facilities operation and management. “MMS,OMS”.
- Full knowledge of facilities maintenance system and operations strategic planning,
- Full knowledge of all safety requirements in site work or warehouses
- Expert engineer in all Mechanical engineering and duties/responsibilities in work filed.

- Full knowledge of power generators, installation, preventive maintenance, electrical connections of electrical cables, load estimation, Extr.
- Excellent experience in constructions duties and responsibilities in the site work “construct work, sewer system, water distribution system, fuel storage requirements, field tests, quality inspection”, projects managements,
- Excellent experience in road paving by asphalt and interlock bricks installation, concrete roads.
- Excellent experience in quality control procedures and quality assurance procedures, QAP and OCP programs,
- Excellent experience in safety requirements at site works, warehouses, facilities and all types of environments
- Excellent experience in water treatment stations “operation and maintenance ”
- Excellent experience in steel structural construction.
- Excellent knowledge of Windows (all versions).
- Excellent knowledge of MS office (Word, Power Point, Excel, Visio, outlook).
- Excellent knowledge of AutoCAD program
- Excellent knowledge to driving safely all type of vehicles “normal or armory” types. With full experience of vehicles required maintenances” scheduled or argent”

EDUCATION

- Mechanical Engineering Department, University of Technology, Baghdad, Iraq
Bachelor degree in Mechanical Engineering, 2003

Pervious Experiences

- I- **Janat AlBilad company for general contracting** – from Fe 2019 to the present time
 - ❖ Position:- Engineer at the company work sites
 - ❖ Work type:- observed and instructed the workers to applying the work requirements and approvals drawings, following up the materials and subcontractors performance, evaluating the work schedules and work quality,
- II- **US Embassy- Baghdad:-** from Apr 2014 to Dec 2018
 - ❖ Position : facility inspector and maintenance Engineer,

 - 3- Review the mechanical drawings and submittals to check the specification and the quality to approve it
 - 4- Estimate the submittals cost.
 - 5- Write SOW for the projects based on the projects requirements “bill of quantities, specifications and Drawings”

V- VIAP company “ Versar international project assistance” www.viap.org

- ❖ Position: Quality assurance inspector and site engineer
- ❖ Work period: Jan 2007– Feb 2009
- ❖ Work type:
 - 1- Inspecting the work quality at projects sites and applying QAQC standards based on “AFCEE codes and Iraqi standards codes”
 - 2- Supervising the contractors to applying / using the approved drawings and submittals as required
 - 3- Document field tests and make regular inspections visits to applying QAP “quality assurance plan”
 - 4- Ensure work schedule and report delay in work and the reasons when found.
 - 5- Applying safety requirements at the work site.

VI- Taji military base- Baghdad in WGI company” Washington group international” www.wgint.com

- ❖ Position: quality control inspector and engineers supervisor
- ❖ Work period: Jan 2005 – Jan 2007

❖ Work type:

- 1- Inspecting the work quality at projects sites and applying QAQC standards based on “AFCEE codes and Iraqi standards codes”
- 2- Supervising the contractors to applying / using the approved drawings and submittals as required
- 3- Document field tests and make regular inspections visits to applying QAP “quality assurance plan”
- 4- Ensure work schedule and report delay in work and the reasons when found.
- 5- Applying safety requirements at the work site

Letter of Recommendations and Certificates

- Letter of appreciation from US embassy by US Ambassador in 2018 (annual reward for distinct employees)
- Letter of recommendation from US Embassy (HR)
- Certificate of completion IFMA training (online training) as certified facility manager the training contained four courses:-
 - 1- Finance and Business
 - 2- Project management
 - 3- Operation and maintenance
 - 4- Leadership and strategy
- Fire protection requirements and facilities and warehouses, in US Embassy- Baghdad
- Completed driving safely training in US Embassy- Baghdad, to use armory vehicles inside the US compound or outside the Embassy “EHP site- BIA- takes the visitors to official meetings, Extr”.
- Certificates of Appreciation presented by VIAP company “ www.viap.org”
- Certificates of Appreciation presented by WGI company “Washington group international” www.wgint.com
- Certificates of Appreciation Presented by LTC Timmerman, Commander of 1-28 IN.
- Certification of Appreciation presented by LT COL David Anason in Q-west military base.

Training courses and Membership

- 1- IFMA training course “ International Facility Management Association”, the training including four online courses as follow:
 - I- Finance and Business course
 - II- Project Management course
 - III- Leadership and Strategy course
 - IV- Operations and Maintenance course

- 2- GTM inspector training “ Government Technical Monitor” in US Embassy- Baghdad to become official GTM to observed the work performance and work quality at the US Embassy,
- 3- ACI training " American concrete institute":
 - Concrete specification.
 - Requirements of concrete work.
 - Steel reinforcement specification and required quality.
 - Wooden form quality and specification.
 - Field test during the concrete placing process.
 - Concrete curing process and relation with weather condition.
- 4- Construction management training:
 - Field engineering management.
 - Importance of task’s scheduling of projects to finish the project on time.
 - Estimate and calculate project delay time if exist, and identifying the reason and solution for it.
- 5- Road paving and sub base specifications.
 - Sub base selections and sub base field test
 - Compaction steps and standards values
 - Paving process with requirements field test
- 6- Soil compaction test training:
 - To examine and ensure that soil is ready before starting any required civil work, based on "AFCEE requirements and Iraqi standards "
