MANUFACTURING, PURIFICATION LEAD

Process Development ▪ Filtration ▪ Nanomaterials Synthesis ▪ Membrane Fabrication ▪ Membrane Modification ▪ Desalination ▪ Adsorption ▪ Enhanced Distillation ▪ Biotechnology ▪ Wastewater Treatment ▪ Particle & Surface Characterization ▪ Microscopy ▪ Equipment Design ▪ Equipment and Pipeline Flushing ▪ Surface Coating & Finishing ▪ Safety and Inspection ▪ Training

Highly motivated and driven chemical engineer and membranologist with over ten-years of international experience related to advanced filtration, membrane separation, water treatment and desalination, biotechnology, machinery inspection and power generation with industrial, academic and external partners. Expert level ability in membrane fabrication and modification techniques. Highly experienced in nanoscale material synthesis and functionalization, turning of nanomaterial surface characteristics, and hybridization. Solid knowledge regarding purification of various wastewater streams and developing membrane cleaning protocols. Expert in particle and surface zeta potential characterization, as well as additional prominent material and membrane characterization techniques. Solid understanding of wastewater purification and desalination using membrane technology through participation within a world-renowned research laboratory. Solid practical experience in water quality control. Well-versed in experimental design, problem solving, and data acquisition. Able to effectively document, analyze, and interpret scientific data. Proficient in developing and implementing batch records and standard operating procedures. Responsible for laboratory supervision, leadership of junior researchers, and equipment calibration/maintenance.

Technical Skills

- Polymeric Membrane Fabrication (Phase Inversion)
- Nanocomposite, TFC and TFN membrane fabrication
- Carbon Nanotube Purification and Functionalization
- Metal/Metal Oxide Nanoparticle Fabrication
- Coating and Decoration of Nanomaterials.
- Biological Fouling Analysis
- Depth Filtration
- Tangential Flow Filtration
- Surface wettability measurements
- SEM and EDX
- Thermogravimetric Analysis (TGA)
- Raman Spectroscopy (Renishaw)
- Mechanical Tester (Instron 1162)
- Fourier Transform Infrared Spectrophotometry (FT-IR)
- Atomic Absorption Spectrophotometry (Perkin Elmer)
- Centrifugation
- X-ray Photoelectron Spectroscopy (XPS)
- SOP Generation
- Particle Sizing and Charge (Zetasizer, Mastersizer)
- Surface Area and Pore Size Determination
- Total Organic Carbon Analysis (Shimadzu TOC-L)
- Surface Zeta Potential (DLS/EKA)
- Microsoft Office
- MATLAB
- CASA XPS

Experience

Chemical Engineer— (Division of mechanical and chemical activities) **2018 — Present**
Ministry of Electricity, General directorate of Energy Production Projects, Iraq.

Research Assistant — Swansea University, UK **2014 — 2018**
Centre for Water Advanced Technologies and Environmental Research (CWATER)

- Conducted ground-breaking research within the CWATER culminating in peer-reviewed publications within world-renowned journals and books
- Reviewer for Desalination – a world leading publication related to advancements in desalination and membrane science technology (**Impact factor 6.603**).
- Reviewer for journal of Membrane science – a world leading publication related to advancements in membrane science technology; fabrication, modification and application (**Impact factor 6.578**).
- Areas of expertise include fabrication and characterization of membranes and nanomaterials, desalination, water and wastewater treatment, adsorption and process development.
- Supervised two M. Eng. graduate research projects.

Teaching:

EGCM38: Membrane Technology module

- Respond to student inquiries and concerns regarding the course and assignments
- Train students to properly use pilot-scale filtration equipment, develop efficient cleaning protocols, and perform relevant process performance calculations
- Grade student assignments and exams

EGA119: Excel/Bloodhound Project — Computational Lab

- Respond to student inquiries and concerns regarding the course and assignments
- Grade student assignments and exams

Chemical Engineer— (Zubaidia Thermal power plant, Iraq) **2011 — 2014**
Ministry of Electricity, in collaboration with Shanghai Electric Group Co., Ltd.

- Responsible for the installation, operation, and maintenance of water treatment units
- Ensured all mechanical equipment was flushed and primed for optimal process performance
- Conducted quality control and analysis for boiler units

Chemical Engineer— (Al Jadiriah Diesel power plant, Iraq) **2008 — 2011**
Ministry of Electricity, in collaboration with Hyundai Heavy Industries Co., Ltd

- Installation, operation and periodical maintenance of advanced water treatment units.
- Installation, operation and maintenance of HFO purifiers and oily water separators
- Maintenance and control analysis of cooling system water.
- Boiler's water quality control and analysis.
- Hydrostatic test for pipelines.
- Flushing process for engines and mechanical equipment.
- Flushing of diesel oil, heavy fuel oil, water, steam, lubes oil and air pipelines.
- Visual test, radiography test, settlement test and vacuum test for storage tanks.

Education

Doctor of Philosophy (Ph.D.), Chemical Engineering **2018**
Swansea University — Wales, United Kingdom

Master of Technology, Chemical Engineering Guru Gobind Singh Indraprastha University — New Delhi, India	2008
Bachelor of Science (B.Sc.), Chemical Engineering University of Baghdad — Baghdad, Iraq	2005

Honors and Awards

Talented Researchers Medal Iraqi cultural attaché, UK	2018
Acknowledgments award Minister of Higher Education and Scientific Research, Iraq	2018
Certificate of appreciation Hyundai Heavy Industries CO. LTD	2012

Service and Community Activities

Member The Association of Iraqi Academics in the UK	Since 2018
Volunteer Books Donation Campaign in the UK for Supporting University of Mosul Library	2018
