My fellow members of Badra project,

After four years of execution since its start in 2013, Badra project has reached the final stage and will soon start its first gas production (FGP) in April.

Despite the security threats from IS and all the challenges of executing the project in such a remote area, we stand where we are today thanks to your hard work and dedication.

Badra project, SECL's second project executed in Iraq, has all the more significance for SECL, the Iraqi government and the client.

The project is designed to contribute to rebuilding Iraq's national economy after the war. Therefore, successful gas production in Badra will strengthen SECL's standing in the Iraqi market.

Furthermore, the successful completion of Badra project, the first international project of Gazprom, will serve as an opportunity to convince the client that SECL is a reliable business partner.

My fellow members of Badra project,

I know it must have been an exhausting journey to get here, but the finish line is just around the corner. We will cross that line in just a month. Please remember that all SECL members are rooting for you as you exert your final efforts.

We are considering providing the project members with some token of appreciation in recognition of successful gas production achieved by April 15.

I wish that your relentless efforts of the last four years would bear fruits by achieving successful FGP by April 15.

Please keep yourself safe and healthy during your stay on the project site, and I wish the very best for you and your family.

Thank you,

C.H. Park
CEO & President
