EXPERIENCE

I worked as a site Engineer in execution of residential buildings for Sarh El-Blad (aug 2019 – feb 2021) company my job included :

- Preparing and implementing project plans.
- Supervising construction work stages beginning from excavation and foundation works to completion of skeleton frame of the building
- Researching and providing estimates for projects.
- Monitoring and optimizing safety procedures.
- Making recommendations or presenting alternative solutions to problems.
- Confidently liaising with clients and other professional subcontractors.

SKILLS

Engineering

- Good experience at using engineering surveying instruments (Level and Theodolite).

Software

- Established Auto-Cad and drafting skills.
- Have a Good experience with Staad Pro
- Strong ability to formulate reports and conduct research using Microsoft word.
- Competent in the use of Excel for data analysis and reporting.
- Have demonstrated the ability to report and present using Microsoft PowerPoint.

Communication

- Through my Engineering and other employment I have developed good oral and written communication skills and the ability to simply communicate complex ideas through sketches and technical drawings

Teamwork/Leadership

- While working at Sarh El-Blad I was part of a close knit team where we each played a multi skilled role and the sharing of ideas, information and skills was critical to the success of the business and every day activities.
