Drilling, Workover, Completions & Intervention Professional

Dynamic Leader Committed to Championing a Culture of Safety, Efficiency, and Operational Excellence

DRILLING / WORKOVER OPERATIONS MANAGEMENT | LOGISTICS CONTROL | PROJECT / PROGRAM MANAGEMENT
HSE | INCIDENT INVESTIGATIONS | EMERGENCY RESPONSE PLANS | SAFETY DRILLS | OFFICE SUPPORT | RECORDKEEPING
TEAM BUILDING | CONTRACT NEGOTIATIONS | VENDOR RELATIONS | SAFETY CONTROL | PERMIT-TO-WORK SYSTEMS

Highly Accomplished Leader who drives project, program, and operations success in compliance with targeted rules and regulations and in alignment with a company's vision, value, and goals to meet objectives.

Influential Strategist who thrives in fast-paced oil field scenarios to resolve key challenges, and who offers solutions-centric critical thinking for insightful, change-oriented results to promote a safe, efficient work environment while applying technology and innovation in directional drilling, hydraulic and mud systems, casing and drill string design, and completions to improve drilling performance and well economics.

Ambitious Self-Starter who continually demonstrates a commitment to enhancing operational effectiveness and professional standards within well operations in collaboration with rig site personnel.

Bilingual Communicator (Arabic, English) who develops synergistic relationships with key decision-makers, scientists, engineers, analysts, drilling management, superintendents, third-party service companies, and clients / customers, and who leads top peers by example and with ethics and integrity.

Professional Synopsis

MISSAN OIL COMPANY – BUZERGAN OIL FIELD

(2017 – 2019)

Company Man

Expertly coordinate and manage drill site operations, including ensuring that wells are drilled in accordance with approved drilling programs, project initiatives, and company policies and standards, as well as completed on time and in budget. Lead highly skilled third-party workflow in a 24-hour rotation system.

Develop scope, well designs, and cost estimates for projects. Prepare final well designs and drilling programs for exploration, delineation, and development wells, including rig selection criteria, casing and drill string designs, mud and cement programs, wellbore evaluation programs, and well control procedures.

Collaborate with Geoscientists, Completion Engineers, Production Operations, Regulatory Analysts, and Reservoir Engineers to meet and / or exceed objectives. Regularly discuss progress and incidents with the Drilling Manager, including actively consulting on higher risk problems and / or project issues.

Work with Drilling Superintendents on program planning, preparation, execution, performance analysis, and troubleshooting, and communicate among on-site supervisors, contractors, and service providers.

Establish and track Key Performance Indicators (KPI) to drive continuous improvement initiatives, along with assessing risk and high-risk situations, adopting a risk mitigation approach, and leading safety meetings and service company pre-job safety meetings to ensure consistently superior communications.

Issue and / or disseminate Emergency Response Plans among rig site personnel, along with conducting safety drills related to well control and other potential hazards, participating HSE and non-conformance event investigations and reporting, and serving as the focal point on location for emergency responses.

Professional Synopsis (continued)

TECHNIP – PMC KARBALA REFINERY PROJECT

(2016 – 2017)

PMC Logistics Engineer

Demonstrated proven analytical abilities toward driving logistics engineering success, including handling all logistics operations and practices, as well as facilitating efficient RFIs, monitoring shipping status, preparing storage areas and stock control, and building productive relationships with diverse vendors.

Cost-effectively negotiated with client (SCOP) and all subcontractors to meet bottom-line objectives. Ensured seamless administrative / operational efforts by handling high-volume data / records management.

MISSAN OIL COMPANY – BUZERGAN OIL FIELD

(2015 – 2016)

Drilling Supervisor

Applied strong leadership talents toward directing large-scale drilling operations in compliance with HSE-specific rules and regulations. Maximize use of labor resources to attain objectives by planning and prioritizing workflow among a top-performing crew, along with training crew to achieve operational goals.

Promptly resolved issues with stuck pipe, well kick, and gains and losses while expertly handling drilling, casing, cementing, logging, and completion operations. Wrote required daily drilling reports and casing tally. Calculated and verified cementing operations. Interpreted wireline jobs as key Petroleum Engineer.

Contributed skill in managing required check lists at both rig site and rig camp to ensure operations adhered to drilling program, along with rapidly responding to changes per specific office decision-making.

GS ENGINEERING & CONSTRUCTION – KARBALA REFINERY PROJECT

(2015)

Logistics Supervisor

Collaborated with HDGSK JV vendors to coordinate engineering and construction initiatives, including managing site logistics and shipment monitoring, as well as handling charging and discharging, scheduling, and reporting. Liaised among PMC, client, and Iraqi authorities on administrative tasks, quality test reports, and verifications. Attended key meetings with IMX, IBRACOM, and local transport companies.

Liaised among client coordinator in expediting commissioning spares and preparation of operation spares requirement listings. Interfaced among construction contractors to ensure on-time materials distribution.

Education, Professional Development & Technical Summary

UNIVERSITY OF BAGHDAD

Bachelor of Science in Petroleum Engineering (2015)

“Advanced Petrophysics (NMR & Multimin) Analysis Using Geolog Program – Buzergan Oil Field”

LOTOTO Training & Certificate (2017) | HSE Awareness (2016) | Fire Safety (2016)

Microsoft Office Suite (Word, Excel, PowerPoint, Outlook) | Windows Vista | Windows XP
Didger | Surfer | Interactive Petrophysics (PI) | Petrel | Eclipse | Geolog7 | PIPESIM | JewelSuite
