Resilient nations.

Certificate

This is to certify that **HAYDER MUDHER YASEEN** has actively participated in the Innovation for Development basic training activities from September to November 2017.

Innovation for Development is one of the United Nations Development Programme projects in Iraq, which aims to build the capacity of youth in the field of innovation and entrepreneurship and to enhance the entrepreneurship ecosystem in Iraq.

The participants of the basic training activities have been identified based on a competitive selection process on national level. The training included the following:

- Online activities which provided introductory information one month prior to the workshop.
- Three-day training workshop conducted in Baghdad from 12 to 14 October 2017.
- Meetups and informal gatherings among the participants, the volunteers and the management of the project.
- Online follow-up and evaluation to select the participants of the advanced training workshop.

The participants of the basic training activities received training mainly on the following:

- Design Thinking and Lean Start-up methodologies.
- Business Model Canvas.
- Sustainable Development Goals.
