Memorandum

To Whom It May Concern

Sir:

As a part of the Iraqi Ministry of Interior's National Forensic Improvement Plan, the High Institute's Criminal Evidence Training building on the campus of the Baghdad Police College has been renovated into an operational training laboratory.

All of the work for the renovation has been done under the supervision of the **Ayon Al-Saba Iraqi Company**. I am writing this letter as a commendation for the good effort that it has put into the project. The company **Project Engineer Mr. Omar Saba** very diligently to get the work done accurately and in a timely fashion. Also, as it became obvious that some minor modifications needed to be made to the original design plans and that security issues at the BPS were going to be a problem, **Mr Omar Saba** adjusted its efforts and still successfully completed the project.

The HISAD Criminal Evidence Training Laboratory is now a first rate scientific evidence training facility and Ayon Al-Saba played an important role in making that happen.

Regards,

Ted Smith
Senior Forensic Advisor
HISAD Criminal Evidence Training Laboratory
Baghdad, Iraq
19 April 2008

This certificate is presented to

Omar A. Saba

In recognition of successful completion of
ASCE's **Deterioration and Repair of Concrete**,
an on line web seminar held on

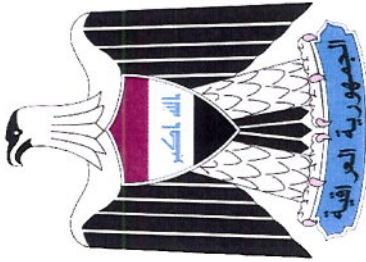

January 14, 2009

and for demonstrating dramatic growth in leadership confidence
and skills, and for demonstrating a commitment to
engineering excellence through lifelong learning.

MEMORANDUM FOR OIC - IAO

22 June, 2011

Subject: Recommendation for Omar Saba

1. Mr. Saba is a General Building contractor working with the Tikrit Resident Office, U.S. Army Corp of Engineers. He has completed the Tikrit Technical Training Center, with a contract amount of \$870,000, and is currently at 70% for the Halabjah 18 room schoolhouse project with a contract amount of \$1.1 million. The Saba Company has been effective in building across Iraq, despite logistical disruptions and an overall unstable security situation. He has successfully used his engineering and construction management background to shepherd these extremely important projects into fruition. At the TTC, the quality of his construction has been greatly appreciated by the customer, the local government officials who will train job specific tasks for the proper administration of city business; thus supporting USACE's goal of helping local authorities provide services for their people. The Halabja School will provide a modern facility for over 500 children. Mr. Saba's has contributed greatly towards a bright future for his country.
2. He submits plans and specifications according to the Scope of Work, corresponds daily with our office, provides knowledgeable project managers and qualified workers, and the requisite materials/ equipment for completeness. He ensures testing occurs and his quality control plan is executed. As the Officer in Charge of this USACE office, it isn't possible for me to provide the daily "eyes on" coverage of a project like the Halabjah School that is 400 kilometers away. We rely greatly on Ahmed's professionalism to provide the quality of work that these projects demand. Mr. Saba has been a willing and able partner of the US Army Corps of Engineers in Iraq.
3. If you have any question or require additional information please contact me at kenneth.s.dupar@usace.army.mil, 540-722-4146.

Ken Dupar
OIC, Tikrit Residence Office
