Translate Spark AR resources – videos and website form – from English to Arabic and combine the translation with the videos to make Arabic people know this new feature from Facebook.
Spark AR platform allows developers for brands, marketers and influencers on its platform to create augmented reality camera effects.

Web Development Team Leader
The Waves

2018-06-15 ↝ 04.12.2018 📅

Began as a member in a web development group, then gradually became a leader on the team to instruct and guide them to learn web development, and then, together, we made two websites based on what we learned. I worked on the backend side using PHP and MySQL. The Waves is an enablement initiative for the IT community in Iraq.

Volunteer Graphic Designer
IRAQ Builders

2019-01-02 ↝ Current 📅

Design images for the initiative. IRAQ Builders is a group of doctors, pharmacists, engineers, workers, businessmen and many other people from Iraqi society standing together with the forgotten and neglected poor families against poverty and the severity of life.

⭐ ACHIEVEMENTS

Engineering Calculator Program 2015-01-11 📅
An advanced calculator includes the four arithmetic operations (+, -, ÷, *). In addition to integration, derivation, Assembly language simulator, calculation of resistor value based on it's color, and logical operations (eg: OR, AND, NOT...etc) using VB.net programming language and Visual Studio2013 as a programming environment

A program to help people with special needs 2016-08-10 📅
The program aims to help disabled people with special needs who cannot speak and move to control their computers and surfing the internet and control other programs - like playing a video, browsing an e-book... etc - on the computer, pronunciation and running of some electrical home devices through this program. And that's done by moving the lips infront of a camera directed to the face to monitor this movements and then convert it to a certain order after it's detected. This program was accomplished using C# and VB.net programming languages and Visual Studio2015 as a programming environment.

🚀 SKILLS

VB.net (80%)

Microsoft Office (Word, Excel, PowerPoint and Access) (80%)

C# (70%)

Article Writing (70%)

Email Writing (80%)

PHP (60%)

HTML, CSS (50%)

Javascript (30%)

C++ (40%)

Matlab (30%)

Python (80%)
